Clearly Associated trainees with the grant - Trainee” may refer to both predoctoral and postdoctoral individuals, regardless of their source of support. For example, Table 2 should include information about ALL previous trainees of the participating faculty members over the previous 10 years. Trainee also refers more specifically to individuals appointed to a particular training program. It is important to distinguish trainees currently or previously appointed to the grant (i.e., as used in Part I of Tables 8A, 8B, 8C) from those “trainees clearly associated with the training program” (i.e., as used in Part II of Tables 8A, 8B, 8C). “Clearly associated” students and postdocs are those with a training experience identical to those appointed to this grant, but who are supported by other NIH or HHS awards (e.g., fellowships or research grants).

To request access submit a service request to HITS via help.med.umich.edu or by calling the Service Desk at (734) 936-8000.

In your request please include the following information:
- Full name of person requesting access
- Uniquename
- phone number
- Department
- Requester's role within the department
- Brief reason for requesting access

xTRACT is a tool for creating training tables. Tables generated in xTRACT must be attached to and submitted with the appropriate progress report or application. There is no Submit feature in xTRACT.
